

FROM WASTE COLLECTION TO VALUE RECOVERY: BUILDING A BETTER PATHWAY

Packaging can **retain value** beyond the product it carries. But littering, improper disposal and gaps in collection systems can **prevent it from reaching recovery channels.**

Recovering that value requires a more organised collection system and a clear pathway to material recovery.

A DEPOSIT REFUND SCHEME CREATES A STRUCTURED RETURN PATHWAY.

A Deposit Refund Scheme (DRS) uses a **nominal refundable deposit** to encourage the return of DRS-eligible empty packaging.

This helps channel packaging into **organised collection systems**, where it can move towards recycling.

MATERIAL QUALITY MATTERS FOR RECOVERY.

How packaging is collected and handled affects its **suitability for recycling.**

Contamination and poor handling can reduce **material quality** and limit the value that can ultimately be recovered.

Sustainable Circularity

BUILDING A BETTER PATHWAY MEANS KEEPING MATERIAL VALUE IN CIRCULATION.

DRS helps strengthen the **return and collection** of eligible packaging. Effective sorting, processing and recycling help turn collected material into a **usable resource.**

The goal: help packaging's material value find its way back into the economy.
